NAVITABS VS. CONFLUENCE TABS

Native tabs are a good start.
Navitabs is built for what comes next.

When documentation grows, Navitabs adds the structure, branding and navigation depth that Confluence's built-in tabs don't cover.

What you need	Navitabs	Native tabs
Horizontal tabs	✓	✓
Vertical tabs	✓	✗
Nested tabs	✓	✗
Tabs from existing pages, page trees or labels	✓	✗
Source-page edits flow into tabs automatically	✓	✗
Dropdowns, cards, steps & progress bars	✓	✗
Central design panel & brand styles across spaces	✓	✗
Government & Isolated Cloud	✓	✗
Included in Confluence, no extra licence	✗	✓

Native tabs are enough when...

- Pages are short and need a few horizontal tabs
- Content is written directly into the tab
- Branding and cross-space consistency aren't critical

Choose Navitabs when...

- Existing page trees should become tabs, with no duplicate content
- Docs are multi-level and maintained by many teams
- Navigation must stay on-brand across spaces
- You run on Government or Isolated Cloud

Navitabs is Cloud Fortified and runs on Forge · **Trusted by PayPal, Disney, Qualcomm & more**
